6. Cut one of the pieces (layer 4) at 1" so that it is 1" x 5 3/8"

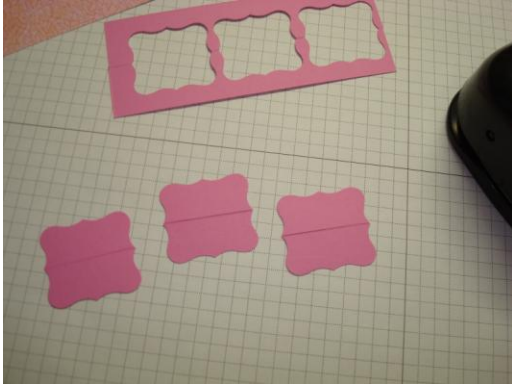

7. Tape together using scotch tape (yea, I know why cut if I'm going to tape it together!) – you'll see next picture. You could cut the label in half after punching out but it is so much easier to do it this way.

8. Punch out label making sure that the cut line is in the center of the punch

12. Add the ½ labels as shown in photo. I just eye it to make sure that all labels were even.

13. Add the ½ labels to the other side.

14. Adhere to layer 2 (DSP)

15. Wrap ribbon around layer 2 and tie a knot.

16. Add brads as shown in photo

17. Whisper White scrap –the sentiment was created in MDS, printed out and then punched out using the oval punch. Add Stampin' Dimensionals and adhere to ribbon as shown in photo.

18. Adhere layer 2 to layer 1 and you're finished!
