Puppy Love MDS Scrapbook Page

Ever give yourself challenges to get your mojo going? Well trying to come up with a page idea and I couldn't settle on one. After starting over 3 times I decided that it was challenge time. I would use a page template provided by Stampin' Up! On MDS and create a page in under 7 minutes. I knew that to do this I'd have to limit the "goods" to 1-2 kits and keep it simple. Well it worked. I love how simple the page is and how it all came together (right under 7 minutes). In fact it took more time to type out the instructions than it did to create!

Supplies:
All elements are from MDS.
Family Fun Photobook (#130987)
Antique Brads (#122164)
Font: from DaFonts.com Janda Everyday

Instructions:
1. Start with new 12x12 page and use Template Square 04. This should be 3 photo boxes in a row with a title/text box underneath
2. Fill the photo boxes with the photos you want (this will help when you choose colors)
3. I chose a background that contrasted with my pictures. I ended up with Pattern 14.
4. Pick a color from the picture and find a Stampin' Up! Color that is close and use that to "frame" each of the pics. This can be done quickly using the frame button on right and selecting "use on all elements this page".
5. Write your title. I used "Puppy Love". I then played with fonts and sizes until I loved one. I ended up using Janda Everyday size 72. Yes this will be very big when I have it printed. But I like how it looks.
6. Next let's fill in a little empty space. All elements are from the Family Fun Photobook elements and stamps. This made it easy to match styles.
7. Pick the elements you want to use and size them to your preference. I enlarged mine slightly so that the words "mostly" fit on. I wanted it to look a little imperfect with the words slightly larger.

8. I created 3 more photo boxes and make them to look like scraps of paper. I loaded them with 3 DSP from the Family Fun DSP choices. Rip 3 of the 4 edges and drop shadows to give it a little more depth.
9. I also used a little stitching from the same kit.
10. I wanted a little journaling but wanted to keep it short and simple so I used a "tag" embellishement from the same kit. I used an "Antique Brad" to set it into place.
11. Using the same font as title I wrote my message. It ended up being size 24 and turned until I liked the way it all lined up.
